(18) Immortal Rank:

See Part IV of The Free Show fuckinreadmeIV.txt for the continuation of this list

Immortal Rank is winning at The Free Show! Woohoo!! SUPER CONGRATULATIONS!!!

Winning at The Free Show gets you Immortal Rank and 2000000000 Tooney Euro's and No Ban Forever at Permanent.

Immortal Rank is 1 Plane above 5-Star General and is your +/-X% QP and does not equal god, me, Kyle Lance Proudfoot.

Winning twice at The Free Show in the same 2-Month Cycle starting 01012005 gets you Immortal Rank 2.

Immortal Rank 2 is 2 Plane's above 5-Star General and is your choice of +/-X% QP and does not equal god, me, Kyle Lance Proudfoot.

There are multiple ways to win at The Free Show.

Immortal Rank is the X-Final way to be Promoted in The Free Show.

These are the different ways to win at The Free Show:

(1) This is a way to win, at The Free Show, too! You, a Member get it if ONLY I, god, Kyle Lance Proudfoot deem you worthy of it after

you get the Highest Rank a god or a goddess can get:

None yet...

(2) Being the ONLY 1 Member with the most quantity of Tooney Euro's EACH 6-Month Cycle starting 01012005 gets you Immortal Rank, too!

See (7) Member's and Rank's (HH) in fuckinreadme.txt

(3) A stunning logical conclusion of apparently con-connected parts of the fuckinreadme.txt's said to me, god, Kyle Lance Proudfoot ONLY.

(4) Being the ONLY Member at the end of the Year who has been logged on for the most cumulative Hours in Session's of The Free Show.

(19) The Free Show Alert Level's:

Depending on what is happening this Day in the life & liveliness of The Free Show there is different Alert Level's:

(A) Alert's:

Null Alert: This is at really boring times where there is nothing left to do.

"Do Nothing on Sunday!" says Silver, High Wizard.

Blue Alert: This is the normal, relaxed, stable, functioning, operating state of The Free Show at most times.

"In the Blue now!" says Silver, High Wizard.

Yellow Alert: This needs to be a stressful situation like pertaining to a pigeon infestation where I f'in live and/or unacceptable delays.

"The Free Show is now at Yellow Alert!" says Kyle, Leader of the Faster Brownies.

Orange Alert: This needs to be something big like a National incident.

"The Free Show and the whole Country is at Orange Alert!" says Silber, Psionic Warlock.

Red Alert: This needs to be something disastrous like a horrible computer crash, epidemic, or Natural disaster.

"Emergency! Emergency! Get your updates, now, pronto! The Free Show is at Red Alert!" says Silber, Psionic Warlock.

Critical Alert: This is the sudden & horrible crashing & dysfunctioning of my Computer Box.

"Ow, ow, ow... leave me the hell alone, oh no my Computer Box just got wrecked!" says Revlis, Vampire Demon.

Terminal Alert: The sudden & horrible crashing & dysfunctioning with unacceptable recovery delays of my Computer.

"Don't do me, man, don't f'in do me, don't do me or there will be horrible consequences on your heads!" says Revlis, Vampire Demon.

Death Alert: The horrible tragic ending of my Head, Body and/or Home and/or my real life.

"Psi ya!" says Kyle Lance Proudfoot, god of The Free Show.

(B) Present Alert: The Free Show is presently at a min of Yellow Alert since, due to the unique nature of The Free Show,

there is no OFF Button; it is still undecided whether or NOT this is a Critical Alert.

(21) The Free Show Priority System:

(A) at a min of Rules:

These are the most important Rules which must be read first and are necessary for the correct functioning of The Free Show.

(B) at a middle of Rules:

These are intermediate level Rules which are read second and must be read by ALL General's and up.

(C) at a max of Rules:

These are advanced level Rules and must be read by a god or a goddess and up.

"Well, at least we have somethin to do..." says Silber, Psionic Warlock.

(22) Character Class Spell's & Item's:

Character Class Spell's & Item's = CC Spell's & Item's = Spell's & Item's = Spell's, Magic Item's, Technological Item's and activation's.

(A) Limit's Of Spell's, Magic Item's, Technological Item's and activation's per Character Class:

The quantity of EACH of your Character Class Item's is > then the # of Item's you can activate in a Session;

you have 20 activation's per Rank per Session in The Free Show. The actual # of Spell's and Item's

is a Total of (your IQ Level, Emotional Level...) ALL your Character Class Level's: Take your Power Level which equals

this Total and reduce it to the first 3 numbers plus your ML; this creates a Spell's & Item's Range from 100 +0ML to 999+29ML

which equals 100 to 1028 Spell's & Item's.

Choose yourself how to divide them. These are real 3D-object's with value's and can be represented by icon's.

Another Limit of Spell's, Magic Item's, Technological Item's and activation's is memory: EACH activation uses a quantity & quality of

Host Server Memory: 8-bits = 1 byte = reads as 1 kb, activated.

I recommend a Host Server at a min of 2 processors and 2 GB RAM at 32 Members logged on at 10 GB Upstream.

It depends, too, if you are using ANSI or Unicode with .txt file's. The Free Show uses Unicode for the advantage of 1000+ Special Character's.

The size of the .txt file's, the amount of referencing, the quantity of .txt in statement's and the # of activation's continuously triggered by

the Client and/or Host Server ALL requires Memory.

(B) Tooney Euro Cost Of Spell's, Magic Item's and Technological Item's:

Spell's, Magic Item's and Technological Item's = Item's = CC Item's = Character Class Spell's, Magic Item's and Technological Item's.

The cost of your Spell's & Item's is based on the description of EACH Item. Consider it to be like a Pizza, where you can put a # of slices

equal to your ML divided by 2 at a max i.e. I, god, Silver can put $40/2 = 20$ descriptive word's in EACH of my Item's. K.I.S.S. at half again.

Of course, the more descriptive word's in EACH Item the more powerful the Item is. Your Item's are denoted in .txt format ONLY in

your CC Item's Table's: your CC Spell's Table and/or your CC MI's Table and/or your CC TI's Table.

This cost's you, a Member, 1000000 Tooney Euro's per descriptive word. Once you pay for a descriptive word you NEVER lose it,

since Terminate is in specified Area's ONLY.

(C) your Character Class Spell's & Item's Starting Tooney Euro Balance:

You, a Member, get 100000000 Tooney Euro's per Character Class to start at Private: These Tooney Euro's CAN ONLY be used for Spell's & Item's.

You, a Member, get 40000000 Tooney Euros per +1 Rank for Spell's & Item's ONLY.

The activation of Spell's & Item's is seperate from activation's of Power's since ALL thing's are per per in The Free Show.

Statement's to or in-response to a Member must include the Member's Nick.

(D) InterActive™ Game Session:

An InterActive™ Game Session uses a lot more Memory relative to a Website.

If multimedia files are added to your Character Class Profile in addition to the .txt and Table's then memory usage is increased.

If you, a Member, are using multiple Character Classes at the same time in your Member Profile then memory usage is increased again.

Multimedia Files have different Memory Heaviness: 3D-Vid, 3D-Anim Visual, 3D-Static Visual, 3D-Sound, 3D-Enhanced Sound,

2D-Sound, 2D-Hi-Res-Photo's, 2D-Low-Res-Photo's, Document's, Webpage's, Text File's in descending order.

The same Memory Heaviness order can be represented in the following ratio's: 22:1, 20:1, 18:1, 16:1, 14:1, 12:1, 10:1, 8:1, 6:1, 4:1, 2:1, where 1 is 1 kb.

Therefore, you, a Member, have 132 kb at a min of 1 of EACH Type Of Multimedia file.

Generally, it is 10 MB per 1 GB of Upstream.

Therefore, to get 64 Member's in a Session at the same time, you, a Member, get 2 MB per Character Class at a min of and

4 MB at a max of per Character Class to start at Private.

To deal with the mem-load on both Client and Host Server side's where Member's have at a max of 5 Character Classes EACH from

5x2 MB to 5x4 MB = 10 MB to 20 MB at a max of 64 Member's logged on at the same time in a 3D-Environment the Host Server needs

128 GB Upstream and 20 GB Downstream and 4x3 GHZ processors and 4 GB RAM and 600 GB disk space allowing for

4 Session's on 1 Host Server Computer at the same time.

joke: Pssst... make sure it's tweaked, too!

"Well, at least, I ain't the one goin'..." says Silver, High Wizard.
